

ARE YOU PREPARED?

Year-round comfort meets disaster preparation in three convenient packages.

Mini split units and generators are a perfect match.

Mitsubishi Electric mini splits have a far lower amp draw than conventional HVAC systems, so they are easier to power from portable generators. By installing a mini split unit with a "generator ready" disconnect or transfer switch, you'll be ready to provide heating & cooling in the event of a power outage.

\$300 Instant Rebate*

with the purchase of a qualifying 1-to-1 high wall ductless system and a generator-ready disconnect or transfer switch.

or

\$600 Instant Rebate*

with the purchase of a qualifying ducted, cassette, commercial series, or dual-zone system - and a generator-ready disconnect or transfer switch.

or

\$900 Instant Rebate*

with the purchase of a qualifying multi-zone system (3+ zones; 24K - 36K BTU) and a generator-ready disconnect or transfer switch.

*Offer valid on qualifying Mitsubishi Electric Heating & Air Conditioning systems. Sales must be made between 3/15/22 - 5/30/22. Subject to change. See dealer for details.
