HARDCAST® TPO Line Set Wrap

ITEM #	THICKNESS	ROLL WIDTH	ROLL LENGTH
326381	22 mil Composite	9"	75'

The TPO rolled mastic sealant is applied by peeling off the release liner while covering the pipe wrap insulation. Since this membrane is 100% solid, there is no shrinkage or additional coats required due to absorption by the insulation. This gives the product superior protection against damage from moisture, landscaping operations, equipment maintenance, and wind.
